

Agenda Item 11a.

Unfortunately, My wife was poorly this morning so I did the school run. No surprise to see that 3 4x4's were parked directly by the junction, not only blocking the bus lane, but also giving me zero visibility up the road towards the shop, so I had to gingerly creep out and hope nothing was passing the cars. there were no cars parked in the new parking spaces opposite the school.

Add to that, i walk my dog along school road most evenings, and those speed bumps are pretty useless. Plenty of cars, especially, 4x4's vans, etc do not even flinch when going over them at speed. I am afraid the development of that road looks good at a glance, but in reality, its a complete, embarassing fail.
